

# Adirondack Sailing Excursions

Built in 1999 at the Scarano Boat Yard of Albany, the Adirondack Schooner is an 80-foot wooden replica of a classic pilot schooner. Though known for her speed (we sail side-by-side with the former America's Cup 12-meter fleet) and maneuverability, she is also a safe and gentle vessel. The most regular journey is to head south from Newport Harbor, down Narraganset Bay, past Hammersmith Farm and Castle Hill. Sailing aboard a classic pilot schooner is a creative and exciting way to host an event. We have accommodated everything from birthdays and weddings to business meetings and client entertainment events. We can tailor your charter to meet your group's needs including scheduling, locations and type sailing. We can provide catering and a full-service bar upon request.
